

NetSuite 2024.1 Highlights

BY CORY ANDERSON

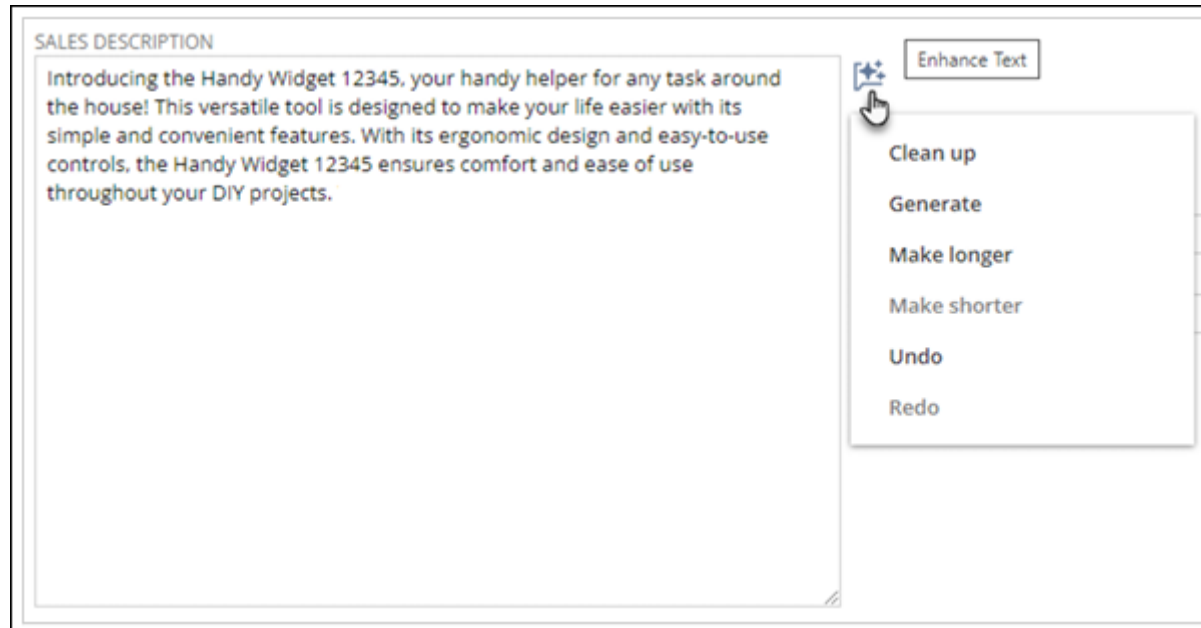

PRINCIPAL, STRATOS ERP PARTNERS

Text Enhance

- Overview:** Text Enhance uses generative AI to assist in writing business content in NetSuite. It's designed to create, refine, and adjust content to the appropriate length for various needs.
- Functionality:** Leveraging information from the editing page, Text Enhance can generate descriptions for inventory items, among other content, tailoring details and tone according to the usage context, like sales or purchase descriptions.
- Availability:** Enabled by default, its accessibility might be limited based on the account's features, location, and language. Administrators can manage its use .

Text Enhance

Favorites Feature Available in Dropdown Lists

- Functionality:** Users can mark up to five favorite items in Customer Add Multiple and Items fields on sales orders, enhancing efficiency by allowing the selection of favorite items directly.
- Configuration:** To use this feature, enable it through Set Preferences > General. Favorites are personal to each user's account and role .

NetSuite Pay Now Available

•**Introduction:** NetSuite Pay, as a managed SuiteApp version 1.0.0, facilitates integrated payment processing, including credit card transactions across various platforms, ensuring PCI-compliant data security.

•**Benefits:** Provides a comprehensive view of customer transaction history and detailed audit tracking while securing payment card data.

•**Implementation:** Available for installation post-provisioning by a NetSuite account manager .

SuiteTax Now Generally Available

- Details:** SuiteTax, previously a hidden feature requiring activation, is now generally available, simplifying the tax management process.
- Activation:** Administrators can enable SuiteTax via Setup > Company > Enable Features > Tax subtab. It applies account-wide and cannot be reversed once enabled.
- Features:** Includes prerequisites for enabling and details on records and transactions migration to SuiteTax .

Ship Central Enhancements

•**Enhancements:** The release introduces several new capabilities for Ship Central, expected by spring 2024, including insurance addition to shipments, delivery confirmation, package code viewing for selection, residence shipping indications, ship manifest generation, rate shopping on the NetSuite UI, subsidiary-specific shipping preferences, FedEx Ground Collect third-party billing, Saturday delivery options, and address validation settings.

•**Key Features:** Each enhancement aims to streamline shipping operations, provide more flexibility in shipping options, and enhance user experience in managing shipments .

Other areas of enhancements to note

- Manufacturing
- CPQ
- Warehouse Management
- Inventory Management

Thank you!
